

# Wellpoint Systems

Griffin Pump & Equipment manufactures a complete line of accessories to aid in your wellpoint and dewatering needs. From the wellpoint to the pump, Griffin Pump can supply the total system for you to install and operate your wellpoint system. From the wellpoint to the pump, Griffin Pump can supply the total system for you to install and operate your wellpoint system.

## SWINGJOINTS

Griffin Pump & Equipment Speedfast swingjoints are a plastic/PVC construction to make them inert to most environments.

They are constructed of a flexible, yet reinforced hose to allow ease of installation while maintaining durability in the field. They include a clear elbow to visually see the flow through the system. The butterfly valve allows the system to be tuned to monitor and maintain the vacuum level on the system without additional tools.

## WELLPOINTS

  
Aquaspade All PVC with Drawdown Tube

  
Aquaspade Self-Jetting, PVC Screen

  
Aquaspade Self-Jetting, Stainless Steel Screen

Griffin wellpoints are the leading wellpoints in the industry. They are available in 1-1/2" or 2" diameters and with stainless steel screen or PVC screen.

They are available in a non-jetting or self-jetting configuration. With our patented "Aquaspade" design, we make the installation easy with a "self-jetting" tip.

## HEADER PIPE

Griffin can supply a complete header pipe system to meet your needs. Header is available in 4", 6" or 8" diameter PVC as a standard.

The complete header system comes with PVC header pipe with saddles already installed. We include the header coupling and screw bands to join to other header as well as plugs to cap the saddles that may not be necessary in your specific layout.

Other fittings such as tees, caps, and elbows are available to complete your system.

Griffin can also supply grommets to be field installed as well as individual components.

In the interest of product improvement, specifications may change without notice.
